

UNIVISIT: A PERSONALIZED WELCOME OF YOUR VISITORS

The safety requirements of your premises are in constant evolution. Especially when they imply the safety of your visitors. It is the reason why the organization, the follow-up and the automation of controls and the recording of visitor's movements within your company is a must.

A company must nowadays guarantee:

Its corporate image

- A personalized and convivial welcome of its visitors
- The safety of visitors coming for a short or long duration
- The protection of the visitors against the dangers existing in hazardous areas within the premises
- The position tracing of visitors in the event of alarm
- The management visitor's flows
- The link between the visitor and his host or his hostess in the company

UNIVISIT is a visitor's management and identification module, designed for companies welcoming external people in their facilities.

The UNIVISIT module enables you to welcome and manage the visitors entries/leavings, planned or not. Thanks to UNIVISIT you will be able to quickly edit a self-adhesive, hard-bound or PVC badge for your visitors and to provide an access card limiting the visitor movements within the safe areas he has to be, for a limited period of time. An identification card for the vehicle can also be printed, allowing the staff in charge to find the owner of a vehicle within a second.

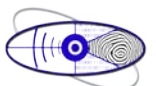

UNIVISIT is a powerful tool storing all visits and visitors historical data. No need to re-encode the regular visitors, UNIVISIT keeps their personal data in the database.

Thanks to UNIVISIT and to the Intranet tool, your staff can plan the future visits.

UNIVISIT: FOR AN EASY MANAGEMENT OF THE VISITORS GROUPS

The management of visitors groups is part of UNIVISIT features. Indeed, it is possible to define a group head who will receive an access card with preset access permissions. The group head is then responsible for all visitors under his responsibility.

CARACTERISTIQUES

- Multi-lingual
- Individual login
- Visits planning
- Arrival and departure data collection
- Access control and identification badges printing
- Printing of badges for the vehicles
